For Immediate Release

Montreal, QC: April 8, 2009 - Kelron Logistics Moves Into New Facility in Montreal

Kelron Logistics, one of North America's fastest growing full service transportation logistics solutions providers, has moved into a new facility in Montreal, Quebec.

"We moved from our former location mainly to accommodate the increased staff necessary to service the needs of the growing North American client base being serviced by our Montreal branch," said Keith Matthews, Executive Vice President and Co-Chairman of Kelron.

Matthews went on to comment, "the new location also offers several direct benefits to our employees that will in turn allow them to provide the highest levels of service possible to our clients. For example, the commuting time for the large majority of staff will be significantly reduced. Ensuring the work environment we provide to employees is as professional and satisfying as possible is a key component of fulfilling our company vision of working together to be a leading provider of customer-driven transportation and logistics solutions."

The new facility is located in Vaudreuil on the Trans-Canada Highway only minutes from Montreal's Pierre Elliot Trudeau International Airport, and will continue to provide a wide range of services to companies throughout North America including both on demand and scheduled truckload, less than truckload and intermodal transportation, as well as outsourced transportation management solutions.

Kelron representatives in Montreal may be contacted by calling 1-866-795-6409 from anywhere in North America.

### About Kelron

Kelron Logistics is a leading provider of intelligent transportation logistics solutions that help companies optimize their supply chain performance and efficiency when moving goods throughout North America.
